MEMBERS' EVENT / EXHIBITIONS

Milan, 16 November - 23 December 2016
TALES new collection by Francesca Mo

Designers
Mo Francesca

In this collection, through a realistic language, Francesca Mo comes to pure abstraction with the breaking down of a story in a set of images that, although having a value alone, combined together can tell a story. In the mixture of different materials (Plexiglas, silver bronze gold.) Mo does not forget the color, that perfectly defines the set. But stories are open, everyone can dial them, not subjugated by the author's supremacy but by our perception of the "Drama" as an action and as a narration of life: "open " jewel sculptures
